

Communication to the Public

RUMPKE

As of today Monday March 23, 2020, Rumpke Waste & Recycling is providing all services on our normal service schedule. As essential service providers, the waste industry is working closely with the federal and state government to ensure exemption from any future mandated emergency shutdowns. Rumpke is in contact with health authorities as well as the National Waste & Recycling Association and OSHA for updates and guidance on industry best practices relating to coronavirus.

Rumpke will be in contact with local Municipalities throughout this health emergency and will notify the City of Forest Park if our services and pickup schedules need to be modified.
